Gabor Suspended Ceiling Mounting Plate

Key Features

- Mounts to 2 x 2' or 2 x 4' Drop Ceilings
- Installs above Ceiling Tile
- Supports up to 60 lb
- Provides Lateral Projector Adjustment
- Two Knockouts for Power or Cable Routing
- Adjustable Locking Cable Support

*Mount your projector to your drop ceiling cleanly with this **Gabor Suspended Ceiling Mounting Plate**. It has a 4" long 1.5" NPT column for universal mount and extension column compatibility and provides lateral adjustment of your projector. The plate has a 60 lb weight capacity with a locking cable support system and features two knockouts for installing optional electrical boxes or cable junctions.*

Drop Ceiling Mounting

The drop ceiling plate fits over the ceiling grid, above tiles measuring 2 x 2' or 2 x 4', and allows just the projector to be exposed, providing a discreet mounting solution for use in classrooms, conference rooms, or home theaters.

Lateral Projector Adjustment

This plate provides lateral adjustment, enabling you to fine-tune the projector's placement.

Universal 1.5" NPT Attachment

The 1.5" NPT interface allows for use with a variety of mounts and extension columns. You can affix optional extension columns of different lengths to accommodate various ceiling heights and installation angles. The included 4" column is designed to provide a clean, discreet look.

Preassembled Installation

The mounting plate comes preassembled to help reduce installation time.

Cable Support System

A locking four-cable support system provides security for the weight of the mounting plate and your projector. They attach to concrete, wood studs, or metal truss supports near the plate's installation point. The locks feature a push-button locking mechanism, allowing you to easily adjust the tension of the cables and lock them into position.

Optional Outlets

The ceiling plate features two knockouts for optional outlets that can provide power and video hookups for easy access. The outlets sit flush against your ceiling and offer a cleaner look than having cables running along the ceiling or wall.
